Read the following passage, then answer the questions:

My hobby is reading. I read story books, magazines, newspapers and any kind of material that I find interesting. This hobby got started when I was a little boy. I had always wanted my parents to read fairy tales and other stories to me. Soon they got fed up and tired of having to read to me continually. So as soon as I could, I learned to read. I started with simple ABC books. Soon I could read simple fairy tales and other stories. Now I read just about anything that is available.

Reading enables me to learn about so many things that I would otherwise not know. I learned about how people lived in bygone days of magic and mystery. I learned about the wonders of the world, space travel, human achievements, gigantic whales, tiny viruses and other fascinating things about our world.

The wonderful thing about reading is that I do not have to learn things the hard way. For example, I do not have to catch a disease to know that it can kill me. I know the danger so I can avoid it. Also, I do not have to go deep into the jungle to learn about the tiger. I can read all about it in a book.

Books provide the reader with so much information and facts. They have certainly helped me in my daily life. I am better equipped to cope with living. Otherwise, I would go about ignorantly learning things the hard way. So, I continue to read. Besides being more informed about the world, I also spend my time profitably. It is indeed a good hobby.

Read the following passage, then answer the questions:

Our home is usually our favourite place to spend time in. However, many accidents occur at home. There are dangerous things in the house and we should be aware of them. Thus, we can avoid unnecessary pain or injury.

Electricity runs many of our home appliances. It is a very useful thing. It is also a very dangerous thing if used carelessly, for it can kill. Electrical sockets and power points are to be handled with utmost care. Young children should never be allowed to go near them. Unless we are very sure of what we are doing, repairs should only be done by a competent electrician. It is only too easy to get electrocuted. Old or faulty appliances should be discarded. If used, they are likely to start a fire somewhere or kill someone who touches them.

The kitchen has many dangerous things. Sharp knives can draw blood, mishandled gas cylinders can explode, hot water can scald and stoves can cause nasty burns. Flies and rats can contaminate food. Thus, the kitchen is not a place to be careless in. If we are careful and know how to handle things there, then the chance of an accident occurring is lessened.

The biggest danger in a bathroom is when the floor is slippery with water or soap. I have heard of many incidents of people, especially old folks, falling in the bathroom. Sometimes the fall is fatal. Often it leaves the victim bedridden. Utmost care is needed here.

Finally, the medicine cabinet should be inaccessible to young children. Dangerous drugs and pills can look like sweets to these young ones. If taken, the consequences can be disastrous. Other dangers do exist. It is up to us to watch out for them.

Although it is a very useful thing, electricity can.

Read the following passage, then answer the questions:

Computers are machines that can help us in many ways. But they cannot think or do things on their own. Humans have to feed them with information and tell them what to do with it. They can save much time and work. For example, all the information and the office files can be stored in a computer's "memory".

The first computers were huge and costly. They filled up almost the whole floor of large offices. Later, because of the usefulness and demand for computers in business, scientists soon found ways to produce cheaper and smaller computers. They invented chips which made it possible to store more information in less space.

Today, computers are not only cheaper, but also more compact. They can just be placed on top of an ordinary writing table. They can even be carried from place to place easily. Computers are not only used in offices by companies, but they are also used at home, by families who can afford them.

Robots, on the other hand, are not mechanical people. <u>They</u> are only moving parts controlled by a computer. A robot can do the same work for twenty-four hours, and yet, it does not complain or get tired. In Japan and in some places in America, robots are used in factories to assemble cars. As computers become more common businesses and factories, people fear that one day computers and computer-controlled robots will put human workers out of work.

Read the following passage, then answer the questions:

The Asian elephant is another type of elephant found in the world, besides the African elephant. They share some similarities. Elephants are social creatures and live in herds. Asian elephants are normally found in countries like India, Indonesia, Malaysia and Myanmar. An adult Asian elephant stands at two to three metres and weighs approximately 5000 kilograms. At birth, it stands at around one metre and weighs approximately 100 kilograms. Like most humans, they give birth to a single baby at a time but the fetus stays much longer in the mother's womb compared to the human baby; 23 months! An Asian elephant has a life span of about 60 years. The diet of an Asian elephant is somewhat similar to African elephants. They feed mainly on vegetation, bark, fruits and flowers.

Living in a herd means that the baby elephant has a large group of adults to look after it, besides its own mother. An orphan elephant is often adopted by another female elephant. As the largest land animal in the world, an elephant requires about 150 kilograms of food and 75-95 litres of water a day. The largest threats to the Asian elephant are poaching and habitat loss. Their tusks are worth a lot of money on the black market, so large-tusked males are in constant danger of being poached. Elephants are also captured alive for domestic use, such as tourist attractions.

Read the following passage, then answer the questions:

Sally loved animals. All her favourite programs on television were about animals. The same goes for her school supplies and clothes. Her favourite animal was the cat. She had wanted to own a cat since she was eight years old. Unfortunately, her mother's feelings towards animals were the opposite of hers. So, Sally was forbidden to own a cat, but one day, something happened that helped Sally get her wish.

She was on her way to the shop across the street from her house. The traffic was quite heavy that day so she was extremely careful before crossing the road. When she got to the other side, she heard something and went over to the grassy area near the pavement. It was a kitten! It was badly injured and was lying here all curled up and looking very frightened. Sally gently picked it up and went home as quickly as she could.

She told her mother how sorry she felt for the kitten and begged her mother to let her look after it. Seeing how upset Sally was, her mother agreed. After a few weeks with the family, the kitten was soon loved by all and became Sally's pet. Even her mother loved the kitten. And that was how Sally got her wish at last!

Read the following passage, then answer the questions:

Clocks are used to measure and show the time. Clocks are used so that people can agree on the time. People use clocks to measure units of time that are shorter than natural units. Natural units are the day, the month, and the year.

The clock is a very old invention. Sundials were used in ancient times. Sundials work by measuring shadows that are cast by the sun. Candle clocks were used a very long time ago. Candle clocks work by measuring the time it takes for the wax to melt Hourglasses are similar to candle clocks because they also measure the time it takes for something to happen. Hourglasses work by measuring the time it takes for sand to pour through a small opening into a glass.

Mechanical clocks appeared in the 13th century in Europe. They work with a system of moving gears. The gears always move at the same speed. Pendulum clocks work with a swinging weight.

The swinging weight is called a pendulum. The pendulum makes the clock parts move. Now people typically use mechanical clocks or digital clocks. Digital clocks show numbers on a screen. The numbers represent the time. Some people use auditory clocks. Auditory clocks use language to tell the time aloud. Computers also use internal clocks in order to work properly.

Clocks are everywhere – in homes, schools, offices, and public places. People go to work and return home according to the clock. School days start and end according to the clock. Airplanes take off and land according to the clock. It is fun to imagine a world without clocks!

Read the following passage, then answer the questions:

Light from the sun or a light bulb moves in straight waves. When the light waves hit an object, they bounce off of it. This action is called reflection. For most objects, the light bounces in many directions at the same time. When this happens, it allows us to see the object. A picture of the object is sent to the brain from the eye. The brain helps us understand what we see.

Light waves also bounce when they hit a smooth, shiny surface. Hitting a surface like a mirror makes the light waves bounce directly back to your eyes. This movement allows you to see yourself. It creates a reflection. You see the objects around it instead of the mirror itself. Anything shiny may act like a mirror when the light hits it. Have you ever seen your face reflected in the rounded side of a pot or pan? You can even see reflections on the surface of water if it is smooth and still. You have probably seen beautiful pictures of mountain scenes. Often the mountains and sky are reflected on the smooth surface of the lake.

Water and glass have a special ability. They can refract, or bend, light. That's why a spoon in a clear glass of water will look bent when it really is not. The ability of glass to refract light has given us some useful products. Eyeglasses help us see clearly. Magnifying glasses enlarge our view of an object.

c) Sara's hobby.

Read the following passage, then answer the questions:

Being an only child, there was not much that Sara could do when she was alone. Reading her books made her life seem so much more interesting. She read so much that she earned the nickname 'bookworm'. Because of all the reading that she did, her grasp of the English language was so good that no one in her level could ever beat her at it.

Her teachers were all so proud of her. They especially enjoyed her compositions as she had a very good imagination and could write very well. One day, a surprise waited for Sara in school. Her teacher had shown some of her compositions to a friend of hers who was a book publisher.

The publisher was so impressed with Sara's writing that he offered Sara the chance to write her own novel. Sara wasn't so sure at first whether she had the talent to write a novel. But with her teacher's encouragement she agreed. A few months later, Sara's book was published and put on sale. They sold like hotcakes! Everyone was proud of her and Sara discovered that this was what she wanted to be an author.

Sara received a "pat on the back" from friends, family, or coworkers. She continued develop her style of writing and her own personal sense of pride and accomplishment.

Robert: Robert.

Selim: Selim.

Cara: Nice to meet you!

Robert and Selim: You too.

Robert: Nice accent. Where are you from?

Cara: I'm from Glasgow.

Robert: Oh, really? My mum's from near Glasgow, so I'm half Scottish.

Cara: Cool. Do you live in Scotland?

Robert: No, we live in England, near Manchester. My dad's from there. What about you, Selim?

Selim: I'm from Leeds originally but I grew up near London.

Cara: Are you both doing history on its own?

Selim: No. I'm doing history and German.

Robert: I'm doing it with maths, actually.

Selim: History and maths. That's different!

Robert: Yeah, I couldn't decide between arts and sciences. Maths doesn't help with

remembering dates, though! And you?

Cara: I'm doing history and French.

Selim: I wanted to do French but German was easier, so I took that.

Cara: German is so hard!

Robert: Me too, but I've got a big maths project too.

Cara: How about we meet first to plan what we're going to do? Just for an hour.

Robert: Good idea, Cara. **Cara**: When are you free?

Robert: I can always do mornings before 10.

Cara: Robert ... Uh ...

Selim: I'm sleeping before 10!

Robert: OK! OK, so when are you two free?

Cara: Wednesdays are good for me. But not very early, please!

Selim: I can't do the mornings on Wednesdays but I have 3 till 5 free.

Robert: I can do 4 o'clock, just before my maths class.

Cara: Great, 4 then. Where shall we meet?

Selim: The library?

Robert: I don't know. The library isn't a good place for a planning meeting as we can't talk in

there.

Cara: How about the university café? It's near the library. We can talk in there. And eat cake.

Selim: Cake is good.

Robert: OK, so Wednesday at the café. I need to leave at ten to five to go to my maths class.

Cara: No problem. Planning will take less than an hour.

Selim: OK! See you Wednesday for cake.

Robert and Cara: See you, Selim!

Hello, everyone. Hello! It's nice to see you all here. Welcome to British Life and Language. I am your teacher. My name is Lindsay Black. That's L-I-N-D-S-A-Y Black. Before we begin, some information about the class.

Our class is in room 13, on the first floor. When you go upstairs, turn left to find the room. Again, that's room 13.

We have class twice a week, on Monday and Wednesday. Our class begins at 4.30 p.m. and lasts 90 minutes, so we finish at 6 p.m. That's 4.30 to 6. Please arrive on time, OK?

Also, I have an office hour if you have questions. I'm in office 7B on the second floor. My office hour is Friday at 6 p.m. So, if you have any questions or problems or want to talk to me, it's Friday at 6 p.m. in office 7B.

We begin next week, on March the 13th. That's Monday, March the 13th. The course ends on May the 20th. May the 20th is the last day.

I think that's all ... Oh, one more thing. For this course you need the book. Here it is: *British Life and Language Level 1 Student's Book*. So, please get a copy of the book. I don't want to see any photocopies of the book, thank you! Remember, it's level 1 student's book. Don't buy the teacher's book.

I think that's all, everyone. I look forward to working with you. See you next Monday!
